

## Sage 50 Manufacturing Settings Directory

### Sage 50

The settings directory by default, is held in the Sage sub-folder within the ProgramData folder, e.g. C:\ProgramData\Sage\Manufacturing. It holds various sub-folders which control a number of settings for Sage 50 Manufacturing – including:

- Layouts/Reports – The default path to the Manufacturing Layouts and Reports
- Lists – Contains a saved configuration file for each list view in Manufacturing per user (e.g. BOMList\_SGOList1\_Manager.list). On occasions, changes to the list configuration can cause a user specific issue where the program will crash on launch or when opening a particular module.
- Toolbars – Contains a saved configuration file for each toolbar in Manufacturing per user (e.g. BOMList\_MANAGER.tbar)
- SchemaChanges – Contains a SQL file pertaining to each version up to the most recent version which is installed.
