

# Cim50 & Cim200 Product Comparison

Sage Tech Partner  
Plus

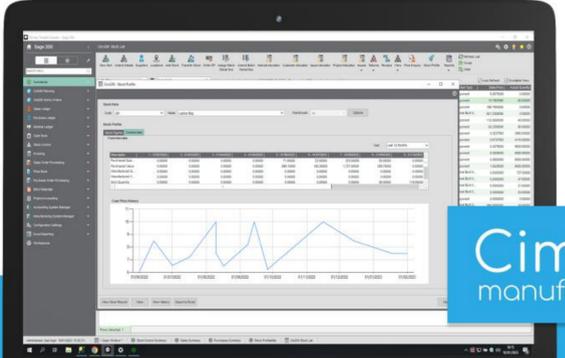

Cim50  
manufacturing

Modular manufacturing software that syncs in real time with Sage 50 Accounts.

Cost-effective option with lower system requirements suitable for smaller businesses. Cim50 is a modular, software meaning businesses can pick and choose modules to suit their needs and budget.

Suitable for businesses with between 1 and 20 concurrent users.

Typical cost ~£295/€345 per month.

Cim200  
manufacturing

Advanced manufacturing add-on fully integrated within Sage 200 Professional.

Comprehensive and feature-rich solution suitable for medium to large businesses. Cim200 builds on the additional features Sage 200 Professional provides over Sage 50 Accounts, whilst running on a Microsoft SQL database.

Suitable for businesses with up to 100 concurrent users.

Costs £500.50/€624 per month

# Cim50 & Cim200 Manufacturing Common Functionality

**NOTE:** As Cim50 and Cim200 cannot be used independently of Sage 50 Accounts and Sage 200 Professional respectively, we have combined the CIM and Sage functionality in this document.

## STOCK CONTROL

- Multiple stock bins
- Batch/serial number traceability
- Multiple suppliers per stock item
- Supplier price breaks
- Supplier lead times
- Units of measure
- Stock profile
- Rapid stock entry
- Quarantine
- Traceability enquiry
- Stocktake
- Stocktake traceable items
- KPI reports
- 20 Analysis codes
- Audit log

## PO & SO PROCESSING

- Needed by
- Allocate in receipt
- Amend deliveries
- Over receive
- Pro formas
- Advanced quotes
- Kit despatch
- Amend deliveries
- Analysis codes
- Available to Promise

## PLANNING

- Make for stock
- Sales forecast entry
- Demand schedule
- MRP buy and make recommendations
- Create WO & PO from recommendations
- Automated demand schedule & MRP
- Jobbing and batch processing

## WORKS ORDERS

- Batch (repeat) works orders
- One-off works orders
- Shop floor paperwork
- Allocate and issue stock to WIP
- Sub-contract processing
- Integration with project accounting
- Estimated versus actual costs
- Capacity planning
- Work to enquiry
- Trial kitting of works orders
- Reverse completion
- Archive works orders
- Labour and machine bookings
- Audit log
- Carbon Footprint Calculator
- 20 Analysis codes

## BILL OF MATERIALS

- Unlimited components
- Unlimited sub assembly levels
- Operations
- Component/operation association
- Sub-contract operations
- Kit bill of materials
- Cost bill of materials
- Multi item trial kitting
- Create orders from trial kitting
- Build/transfer
- Reverse build
- Max build
- Multiple components lists
- Explosion/implosion
- Audit log
- 20 Analysis codes

## QUOTATIONS

- Customer quotations
- Prospect quotations
- Stock item quotations
- Bill of materials quotations
- One-off quotations
- Price breaks
- Convert to sales order
- Create WO & PO from quotation
- Profit reporting, margins and markup
- Configurable
